Edoardo Galli

Software engineer building AI agents, based in Bologna

edoski.dev@gmail.com edoski.com github.com/edoski linkedin.com/in/edoardo-galli-5074321b9

Experience

Sep 2026 – Present
Software Engineer, Amoreg
- Lead development of Iris, an AI agent for safety-gated LinkedIn outreach
- Ship features on Amoreg's core product, an agentic compliance platform
- Build internal tooling, agent infrastructure and CI/CD for the team

Apr – Sep 2026
Research Intern, DISI, University of Bologna
Supervised by Prof. Federico Montori and Dr. Ivan Zyrianoff
- Researched deep learning for EVM transaction timing
- Built KAIROS end to end: data pipelines, HPC training, on-device inference

Education

Sep 2026 – Present
M.Sc. Artificial Intelligence, University of Bologna

Sep 2021 – Oct 2026
B.Sc. Information Science for Management, University of Bologna
Final grade 108/110

Publication

2027
KAIROS: A Predictive Framework for Cost Optimization in Blockchain Environments
I. Zyrianoff, **E. Galli**, A. Esposito, L. Gigli, M. Di Felice and F. Montori
IEEE Consumer Communications & Networking Conference (CCNC 2027)

Projects

Servatus Zero-dependency PyPI package for resumable Slurm campaigns
Python, Slurm, OpenSSH, Apptainer, POSIX

Journal Automates Flow focus data, goals and reminders in Obsidian
Python, Pydantic, pytest, Obsidian

Skills

AI agents	Claude Agent SDK, MCP, Vercel AI SDK, model evaluation
Machine learning	Deep learning, time series forecasting, PyTorch Lightning, ExecuTorch
Data and HPC	Python, Polars, pandas, Slurm, Apptainer, Docker, Linux
Web	TypeScript, React, Next.js, PostgreSQL, Tailwind CSS
Languages	English (IELTS Academic 8.5), Italian (native)
