

# Edoardo Galli

Computer Science Graduate

Bologna, Italy | [edoardo.galli3@studio.unibo.it](mailto:edoardo.galli3@studio.unibo.it) | [edoski.com](https://www.edoski.com) | [github.com/edoski](https://github.com/edoski) | [LinkedIn](#)

Computer Science graduate pursuing an M.Sc. in Artificial Intelligence at the University of Bologna, focused on deep learning and reproducible, data-intensive AI systems.

## Education

|                                                                          |                                |
|--------------------------------------------------------------------------|--------------------------------|
| <b>M.Sc. Artificial Intelligence</b><br>University of Bologna            | Sep 2026–Present               |
| <b>B.Sc. Information Science for Management</b><br>University of Bologna | Sep 2021–Sep 2026<br>GPA 28/30 |

## Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                             |              |

| <ul style="list-style-type: none"><li>Conducted deep learning research on short-horizon transaction timing across EVM blockchains under Prof. Federico Montori and Dr. Ivan Zyrianoff.</li><li>Designed reproducible experiments comparing LSTM, Transformer, and hybrid architectures.</li><li>Developed KAIROS end to end, from data pipelines and HPC training to economic evaluation and on-device inference.</li></ul> |              |

## Publications

### KAIROS: A Predictive Framework for Cost Optimization in Blockchain Environments

I. Zyrianoff, **E. Galli**, A. Esposito, L. Gigli, M. Di Felice, and F. Montori  
IEEE Consumer Communications & Networking Conference (CCNC), 2027.

## Projects

### KAIROS

Deep learning system for blockchain transaction timing  
Python, PyTorch, Polars, Pydantic, ExecuTorch  
Built a reproducible Python/HPC pipeline for temporal model training, evaluation, and on-device inference.

### Journal

Personal analytics journal pipeline  
Python, Pydantic, pytest, Obsidian  
Automated Flow focus data, goals, reminders, and period metrics into a typed Obsidian workflow.

### Stack Overflow Developer Survey 2025

Developer trust in AI tools  
Python, scikit-learn, pandas, statsmodels, seaborn  
Modelled developer trust using leakage-safe preprocessing and interpretable statistical and ML methods.

## Skills

|                      |                                                |
|----------------------|------------------------------------------------|
| <b>AI / ML</b>       | PyTorch, PyTorch Lightning, scikit-learn       |
| <b>Data</b>          | Polars, pandas                                 |
| <b>Systems / HPC</b> | Slurm, Apptainer, Docker, Git                  |
| <b>Programming</b>   | Python, TypeScript, Java, SQL                  |
| <b>Languages</b>     | English (IELTS Academic 8.5), Italian (native) |
