

Edoardo Galli

Computer Science Graduate

Bologna, Italy | edoardo.galli3@studio.unibo.it | edoski.com | github.com/edoski | [LinkedIn](#)

Computer Science graduate pursuing an M.Sc. in Artificial Intelligence at the University of Bologna, focused on deep learning and reproducible, data-intensive AI systems.

Education

M.Sc. Artificial Intelligence University of Bologna	Sep 2026–Present
B.Sc. Information Science for Management University of Bologna	Sep 2021–Sep 2026 Final grade: 109/110

Experience

Software Engineer Amoreg	Oct 2026–Present
Research Intern Department of Computer Science and Engineering (DISI), University of Bologna	Apr–Sep 2026
- Conducted deep learning research on short-horizon transaction timing across EVM blockchains under Prof. Federico Montori and Dr. Ivan Zyrianoff. - Designed reproducible experiments comparing LSTM, Transformer, and hybrid architectures. - Developed KAIROS end to end, from data pipelines and HPC training to economic evaluation and on-device inference.	

Publications

KAIROS: A Predictive Framework for Cost Optimization in Blockchain Environments
I. Zyrianoff, E. Galli, A. Esposito, L. Gigli, M. Di Felice, and F. Montori
IEEE Consumer Communications & Networking Conference (CCNC), 2027.

Projects

KAIROS 
Deep learning system for blockchain transaction timing Python, PyTorch, Polars, Pydantic, ExecuTorch Built a reproducible Python/HPC pipeline for temporal model training, evaluation, and on-device inference.
Servatus 
Resumable Slurm campaigns with atomic output publication Python, Slurm, OpenSSH, Apptainer, POSIX Published a zero-dependency PyPI package with durable submission receipts and no-replace atomic commits.
Journal 
Personal analytics journal pipeline Python, Pydantic, pytest, Obsidian Automated Flow focus data, goals, reminders, and period metrics into a typed Obsidian workflow.

Skills

AI / ML	Deep Learning, Time-Series Forecasting, LSTM, Transformers
ML Frameworks	PyTorch, PyTorch Lightning, scikit-learn, ExecuTorch
Data	Polars, pandas, Data Pipelines, ETL
Systems / HPC	Linux, Bash, Slurm, Apptainer, Docker, Git
Web	TypeScript, React, Next.js, Tailwind CSS
Programming	Python, TypeScript, Java, SQL
Languages	English (IELTS Academic 8.5), Italian (native)
